Database Management System(MSQL)

● VOLUNTEER

Positive thinking

Flexible and adjustable

ABOUT ME

I'm an 18-year-old passionate about full-stack development.

I've learned HTML, CSS, and JavaScript as my foundation.

I'm mastering React.js for creating dynamic frontends.

I work with Node.js + Express.js and MongoDB for backends.

I love building projects, sharing them on GitHub, and deploying them online.
